Image Black Border Removal

##

Package install:

- opencv-python
- PIL
- numpy

```
pip install -r requirement.txt
```

## Usage:

```
python python3 main.py ./IMG_2543_1.jpg [--output_dir] [--threshold]
```

Other argument:

- `--output_dir` : Where to store the result, and create the directory manually.
- `--threshold` :default=5, the maximum is 255, the higher the threshold, the lighter color of the border will be cut out, it depends on the noise of your image border is.

Result

threshold=5(default)   threshold=100(default)
